

Abstract of the Disclosure

0001. The "plastic disposable trash can top", namely the "Dispotop", was invented to resolve the many problems which result from the loss of trash can tops. With this invention, a missing or lost trash can top can be replaced at minimal cost to the consumer. By simply stretching and placing the elastic bottom of my device over the top of the trash can in place of the missing lid, eliminates and resolves many environmental and safety hazards. Its' usage results in helping to keep a cleaner, safer and more sanitary environment. Never has there been a replacement cover for a trash can. Also this invention can protect different outside items from certain climatic conditions. Because of the material and structure of this invention, it is very versatile and appropriate for its uses.
